**Abstract****Cosmetic Compositions**

20 Cosmetic compositions in the form of soft solids having  
in combination an improved resistance to syneresis and  
retained efficacy and which contain a particulate  
antiperspirant suspended in a water-immiscible carrier  
liquid structured by a structurant system are obtainable  
25 by employing as carrier liquid a mixture of a hydrocarbon  
oil and an aromatic ester oil in a weight ratio of from  
1:2 to 15:1 and as structurant system from 5.5 to 20% in  
total of a di or triblock alkylene/arylene block  
copolymer and an organic wax in a weight ratio to each  
30 other of from 5:1 to 30:1.
